23. Problem: (use additional Sheets if necessary) One new capability has been added to the ECS baseline with this release. ECS will now be able to FTP Push the Bulk URL metadata update XML files to ECHO, as opposed to ECHO having to figure out which URL XML files to FTP pull via anonymous FTP out of the DPL archive. This new capability is documented in Ticket WD_S4_05 (ECHO Support – Pre-Delete, Order Only and FTP) and NCR 37243 (FTP Push of Bulk URL, Inserts/Deletes). Please refer to section 3 in the 6A08 PSR document for more information.						
24. Proposed Solution: (use additional sheets if necessary) This release of 6A08 and Patch 6A08 System.01 is a complete delivery of the entire ECS System. BMGT suppresses the export of the collection endingdate/time when the EndsatPresentFlag = Y. When a collection is closed, BMGT would detect an EndsatPresentFlag = N and export the updated ending date/time to ECHO. BMGTCollectionMetaData.dtd has also been modified to reflect this change. Please refer to section 3 in the 6A08 PSR document for more information.						
25. Alternate Solution: (use additional sheets if necessary) None						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) No new 6A08 functionality or fixes will be delivered.
